Footnotes to the Network Monitoring Report: L-band N19L1

General:

- a) **Jb, Jodrell Bank (Lovell):** Warm receiver. Fixed and joined before the end of the NME (but not in time to send FTP-test data).
- b) **O8, Onsala:** Stopped in scan 8 due to strong winds.
- c) **T6, Tianma:** Recorded linear polarization.
- d) **Ur, Urumqi:** Recorded linear polarization. Could not provide ANTAB information for the whole session due to invalid TPI recording. The issue is being investigated.
- e) **Sv, Svetloe:** Broken LCP.
- f) **Ir, Irbene:** Wrong DBBC setup at the beginning of the observations.
- g) **Sr, Sardinia:** Got fringes after reconfiguring the DBBC and rebooting the IF Distributor before scan 8.
- h) **Ar, Arecibo:** Did not participated.
