

WURM, 7-5-2018, 14.00

present Mark, Paul, Wybren, eBob, Harro, Arpad

Mark: did CASA stuff, fixed some things for Michael, all now seems to work. Mk4 output, good 4fit plots. Working on model. Lots of DBBC discussions

Paul: trip to Wb, connected Fila10G, maar has not been configured yet. Mark5B is still connected, 1G connection though. Installed WR switch, need some attenuators. Maser at Wb seems upset, repair man will come soon. Today work on backend of Dw tel, next week SaDT CDR. Disks of On have arrived.

Wybren: working on monitoring. Put On disks in flexbuff 0. Do the admin of FB 10 and 11. Helped Aard with tests, e seems to have packet loss, ongoing.

eBob: helped Aard set up test surrounding. Cleaned up flexbuff control gui. Fixed bug in log2vex and is reading SCHED code

Harro: consultancy for Ny Aalesund, big flexbuff and DBBC3, quite slow, some things not understood yet. Some emails from Ed, problems with Mark5. Joined the discussion about the DBBC FW versions. Working on j2ms2, handling of metadata from correlator to data, some bugs and limitations. Some design flaws as well, trying to fix them.
