Footnotes to the Network Monitoring Report: \mathbf{L} N16L3

General:

- a) STATION: Ef Stayed on 1st target source (didnt slew to second or third), thus the later parts of the NME are missing.
- b) STATION: O8 Strong winds, could not participate.
- c) STATION: Ur Repair work, did not participate.
- d) STATION: Ir Good fringes on first source later sources have weaker fringes than expected for Ir. Possibly due to source properties.
- d) STATION: MERLIN stations Data recoded for Cm, Kn, De often had reasonable sample stats but no fringes acheived.
