

JUC meeting, Thursday February 19, 14.30, Arpad's room

present Jonathan, Harro, Des, Arpad

Jonathan: inserted sine waves using "normal" scripts, weights 0, but fringes??

Done manually, once with once without phase offset. Weights fine, phase offset correct

Arpad: dr. Bob seems completely underwhelmed by differences in phase between SFXC and UB. Need to correlate new data set asap with both UB and SFXC. Des will tell Jonathan and Aard where what data is, correlation params. Then involve experts, dr. Bob, Sergei.
